

Patient Information form

SEMEN ANALYSIS, POST VASECTOMY

The sample should be collected after 2 days of sexual abstinence, but less than 7 days.

- Collect total ejaculate by masturbation in a clean, dry container, or in a screw-capped, sterile container supplied by Meadville Medical Center Laboratory.
- Label the container with name, date of birth, date of collection, and time of collection.
- Keep specimen warm as close to body temperature as possible until it is delivered to the lab.
- Deliver to the lab as soon as possible. Delivery within 1 hour is optimal for examination.

No appointment is necessary.

Test is available Monday through Saturday.

Please report to Meadville Medical Center Registration before delivering the specimen to the lab. This is necessary for complete specimen identification and processing.
